Professional Study Tool and Reliable Exam Practice Material

Exam : **PSE-DataCenter**

Title : SE Professional Accreditation-
Data Center

Vendor : Palo Alto Networks

Version : DEMO

NO.1 What is the default interval for the HA heartbeat ? :

- A. 1000 milliseconds
- B. 5 seconds
- C. 100 milliseconds
- D. 2 seconds

Answer: A

NO.2 A client has a sensitive application server in their data center and is particularly concerned about session flooding because of denial of-service attacks.

How can the Palo Alto Networks NGFW be configured to specifically protect this server against session floods originating from a single IP address?

- A. Add QoS Profiles to throttle incoming requests
- B. Define a custom App-ID to ensure that only legitimate application traffic reaches the server
- C. Add an Anti-Spyware Profile to block attacking IP address
- D. Add a tuned DoS Protection Profile

Answer: D

NO.3 Which statement is true regarding the HA3 interface on VM - Series firewalls in an HA configuration?

- A. The second VM - Series firewall should be in the same virtual machine so the HA3 connection does not have to travel over a physical connection .
- B. The HA3 connection should traverse no more than a single virtual switch.
- C. There is no HA3 connection on a VM - Series firewall.
- D. The second VM - Series firewall should be in a different host and the HA3 connection should be over a dedicated high - speed link .

Answer: C
